

Model 135 Exit Receiver

Part # A03290920

Description

The Secure Care Products, Inc. Model 135 Exit Receiver is a factory tuned radio frequency unit designed to receive signals from ID Coded Transmitters. The Model 135 Exit Receiver can detect transmitters and pass information to the ID Exit Panel. The receiver also contains a threshold adjustment which allows the installer to increase or decrease the the detection range of the system (see installation documentation for adjustments).

(All unit dimensions are approximate)
