(All unit dimensions are approximate.)

Description

The 619 and 629 Full Coverage Antennas should cover a four foot single door or an eight foot double door respectively. The antennas should collect RF signals from the Infant Transmitter and send them to the receiver. The antenna's enclosure is an attractive durable plastic which can be painted if the customer desires. Standard fittings are supplied with the antenna kits, but there are various fittings available for corners, ends and splices.

Material Included (619 Single Door)

| (description) | (part #) | (qty.) |
|---|-----------|--------|
| Section A (Six feet of raceway and two A06190021 Uncased Scepter Antennas w/ Hook and Loop Fasteners) | A06190022 | 1 |
